

## DeoxIT® GOLD - Contact Enhancer, Conditioner & Protector

**DeoxIT® GOLD** (formerly ProGold), is a unique conditioning solution that improves conductivity and provides long-lasting protection on gold, base metals and other precious metal contacts and connections (gold, silver, rhodium, copper, bronze, nickel, etc.).

***Use on plated connectors, contacts and metal surfaces for maximum performance and protection.***

Recommended for critical applications where only slight cleaning action is necessary. If the surface looks clean, applying DeoxIT contact cleaner first is usually not necessary. DeoxIT® GOLD is designed to dissolve small amounts of oxidation. Apply DeoxIT® GOLD after DeoxIT® contact cleaner on plated metal surfaces, except where noted with DeoxIT® SHIELD below. The more critical the connection or part, especially low current applications, DeoxIT® GOLD should be the final step. For reference, DeoxIT® GOLD has approximately 0.5% cleaning action.

### }. **KEY FEATURES:**

- }. Improves Conductivity
- }. Maintains Optimum Signal Quality
- }. Protects Base Metals from Oxidation
- }. Prevents Dendrite and Fretting Corrosion
- }. Forms Protective Anti-Tarnishing Layer
- }. Reduces Arcing, RFI and Intermittent Connections
- }. Reduces Wear and Abrasion

Temperature Range, -45 C to +240 C □
